

## I'M ADDING MY VOICE TO THE CALL FOR ALL CREATION.

I want to see Australia's leaders provide the vital support and action that is needed to help our most vulnerable neighbours recover from the pandemic and reset towards a more just, compassionate and sustainable society.

Not only can we address the fallout from the pandemic, we can tackle the ongoing tragedy of poverty and the deepening crisis of climate change – so that all creation can flourish.

## 3 ideas *For ALL Creation* to Flourish.

Here are three ways Australia's leaders can provide the vital support and action that is needed to help our most vulnerable neighbours recover from the pandemic and reset towards a more just, compassionate and sustainable society.

**Stand** with our most vulnerable neighbours to end and recover from the pandemic.

**Reset** the path to end poverty.

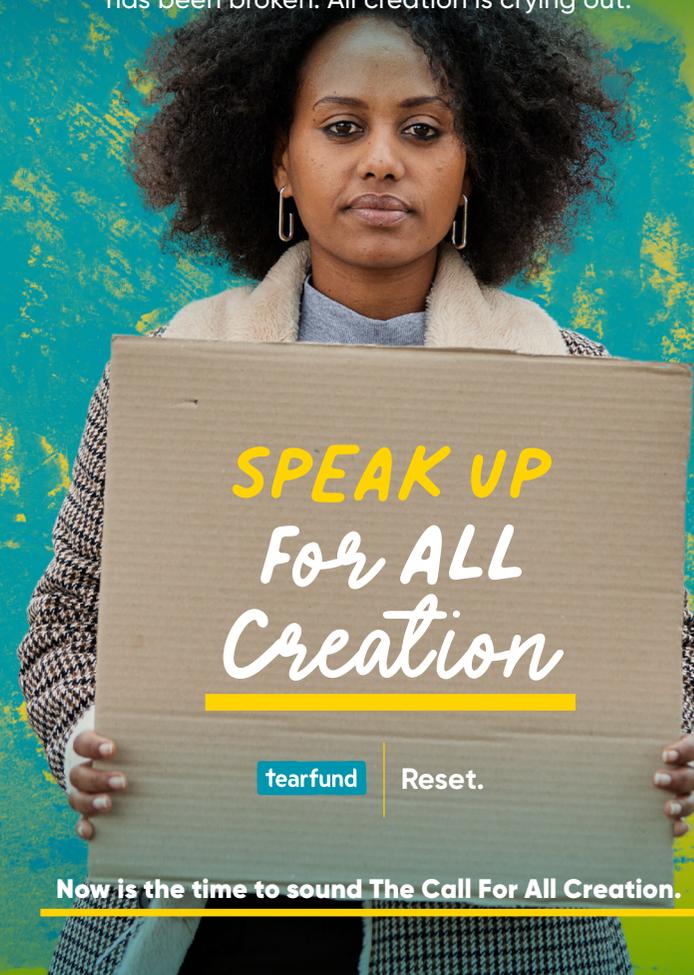

**Build** a sustainable future for all creation.

Reset.

The pandemic and increasing impacts of climate change are compounding what – for too long – has been broken. All creation is crying out.

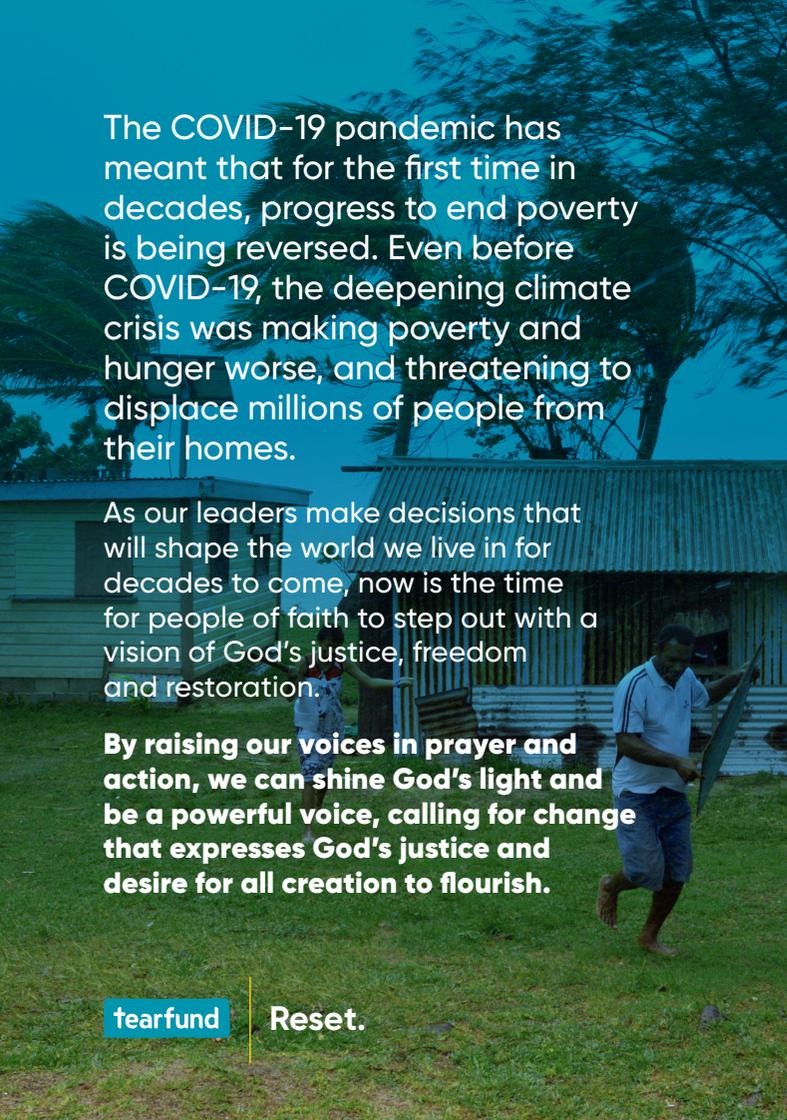

**SPEAK UP**  
*For ALL*  
*Creation*

Reset.

Now is the time to sound The Call For All Creation.

The COVID-19 pandemic has meant that for the first time in decades, progress to end poverty is being reversed. Even before COVID-19, the deepening climate crisis was making poverty and hunger worse, and threatening to displace millions of people from their homes.

As our leaders make decisions that will shape the world we live in for decades to come, now is the time for people of faith to step out with a vision of God's justice, freedom and restoration.

**By raising our voices in prayer and action, we can shine God's light and be a powerful voice, calling for change that expresses God's justice and desire for all creation to flourish.**

tearfund

Reset.

## The Call *For ALL Creation*

We live in an era of unequalled material prosperity. Yet far too many people have been excluded and exploited. And our unconstrained economic growth is pushing the natural world beyond its limits.

Hundreds of millions live in extreme poverty and hunger, millions are trapped in slavery and far too many children die without ever seeing their fifth birthday.

At the same time, species are vanishing from the planet at alarming rates, oceans are acidifying, and climate catastrophes, like floods, fires, droughts and hurricanes are intensifying. The deepening climate crisis is increasingly exacerbating poverty and threatening to displace millions of people from their homes.

We believe that God is calling us today to be a voice for Jesus' mission of good news for the poor and love for all creation. We believe we can, if we choose to, not only address the immediate fallout from the pandemic, but reset our society and global economic system to simultaneously tackle the ongoing tragedy of poverty and the deepening crisis of climate change.

As Christians, we recognise that now is the time for such transformative action, and call on governments and leaders across the world to build a more just, compassionate and sustainable society so that all people and all creation can flourish.
